MD. IMTIAZ AHAMED

Executive, Laravel | PHP, Laravel, REST APIs & Payment Systems

Dhaka, Bangladesh | +8801767536265 | imtiazahmed6265@gmail.com | linkedin.com/in/imtiaz-ahamed-hridoy | github.com/imtiaz-ahamed-hridoy

PROFESSIONAL SUMMARY

Backend engineer with hands-on experience designing, scaling, and maintaining five production systems at Softvence IT Ltd across travel technology, SaaS, generative AI video processing, and online marketplaces. Built high-throughput RESTful services managing 1,000+ travel products, integrated 18 third-party APIs including Stripe, PayPal, Paddle, GlobalTix, and Bókun, and established automated CI/CD deployment pipelines. Consistently delivered 35ms database query latency and under 180ms p95 API response latency through query optimization, composite indexing, and Redis caching. Strong focus on database transaction security, webhook idempotency, and automated test coverage across core business workflows. Available immediately.

TECHNICAL SKILLS

- **Backend & Architecture:** PHP 8.3 / 8.4, Laravel 12, RESTful API Design & Versioning, Eloquent ORM, MVC Architecture, Service-Repository Pattern, SOLID Principles, Queue Workers, Webhook Signature Verification, Idempotent Transaction Processing
- **Payments & Integrations:** Stripe Payments (PaymentIntents, Webhooks), PayPal REST API v2, Paddle Billing v2 (Ed25519 Webhooks), GlobalTix API, Bókun API (HMAC-SHA1 Signing), Firebase Cloud Messaging (FCM), Firebase Auth, RevenueCat, Open Exchange Rates API, Google OAuth, Apple Sign-In
- **AI & Automation:** OpenAI API (GPT-4o, Whisper), Google Gemini API, Anthropic Claude API, Multi-Provider LLM Abstraction, Kling AI API (Motion Control), ElevenLabs API (Voice Cloning), Prompt Engineering, AI Automation (n8n, GoHighLevel), AI-Assisted Development (Antigravity, Claude Code, Codex, Gemini)
- **Databases & Caching:** MySQL 8, Redis (Response Caching, Queue Driver), Pessimistic Concurrency Locking, Database Transactions, Composite Indexing, Eager Loading (N+1 Elimination), Chunked Batch Processing
- **Frontend & Full-Stack:** Blade, Inertia.js, React, Livewire, Alpine.js, Tailwind CSS, Bootstrap, TypeScript, Vite
- **Cloud, DevOps & Tools:** AWS (EC2, S3), DigitalOcean VPS, Hostinger (VPS & Web Hosting), SiteGround, CloudPanel, cPanel, Linux VPS, Nginx, Supervisor, Cron Scheduling, Docker, Docker Compose, Git, GitHub Actions (CI/CD), Postman, PestPHP, PHPUnit
- **Mobile:** Flutter (mobile UI, API integration, and in-app payment flows)

WORK EXPERIENCE

Executive, Laravel | Softvence IT Ltd — Dec 2025 – Sep 2026 | Dhaka, BD

Experience letter available on request

- Architected and delivered backend services and RESTful APIs for five live production systems across travel commerce, education SaaS, AI processing, and real-time marketplaces using Laravel 12 and PHP 8.3/8.4.
- Optimized database query structures and caching across 1,000+ travel products, eliminating N+1 query bottlenecks (cutting queries by 98% from 201 to 3) to achieve 35ms database query latency and under 180ms p95 API response latency on live traffic.
- Engineered memory-safe background data ingestion pipelines utilizing chunked queue jobs, isolated worker pools, and concurrency locks, reducing peak CLI memory from 500MB+ to under 45MB flat across 1,000+ records.
- Implemented multi-gateway payment processing (Stripe, PayPal, Paddle Billing v2) with cryptographic signature validation (HMAC-SHA1, HMAC-SHA256, Ed25519) and pessimistic database locking to guarantee financial transaction idempotency and zero duplicate charges.
- Designed a pluggable multi-provider AI vision abstraction layer enabling runtime zero-downtime provider switching between OpenAI GPT-4o, Google Gemini, and Anthropic Claude via configuration.
- Automated CI/CD deployment pipelines using GitHub Actions across DigitalOcean VPS, Hostinger VPS, SiteGround, and cPanel environments, configuring Nginx, Supervisor workers, and Cron schedulers.

Customer Service Officer | Genex Infosys (Grameenphone) — Aug 2024 – Apr 2025 | Dhaka, BD

- Resolved customer issues using various CRM tools and provided accurate technical solutions.
- Handled customer inquiries and complaints professionally, ensuring timely resolution and high satisfaction scores.
- Documented customer interactions, maintained service quality compliance, and prepared operational reports for back-office teams.

Technical Assistant | Edison Group — Jan 2023 – Jul 2024 | Dhaka, BD

- Maintained and repaired computer hardware systems, including desktops, laptops, and peripherals.
- Assembled mobile devices from components and performed QA testing to ensure hardware reliability and quality standards.
- Supervised technical workers on the assembly line, managing task allocation and productivity.
- Documented maintenance logs, assisted with technical audits, and provided basic IT network support.

LIVE & PRODUCTION PROJECTS

ThingsToDoLists — Online Travel Agency Experiences Marketplace

Website: thingstodolists.com | Admin: admin.thingstodolists.com | GitHub: github.com/imtiaz-ahamed-hridoy/ThingsToDoLists

High-scale OTA aggregating multi-supplier catalogs with real-time booking and multi-currency checkout

- **Catalog Architecture & Data Ingestion:** Built the unified travel catalog backend in Laravel 12 to normalize external supplier feeds from GlobalTix (Asian ticketing) and Bókun (TripAdvisor global tours) across 55 database models and 148 API endpoints, managing 1,000+ live attractions and tours.
- **Database Indexing & Latency Optimization:** Eliminated full-table scans by adding composite indexes, eager loading relationships, and implementing Redis caching. Cut database queries by 98% (from 201 down to 3 per request), delivering 35ms database query latency and under 180ms p95 API response times on production search traffic.
- **Background Queue Processing:** Designed memory-safe catalog synchronization using chunked background queue workers and concurrency locking on DigitalOcean VPS, reducing memory usage from 500MB+ to under 45MB flat across external product records.
- **Payment Integration & Checkout Security:** Built multi-currency checkout with automated daily exchange rate updates and dual payment gateways (Stripe, PayPal). Enforced cryptographic webhook signature verification and database transactions to prevent race conditions and duplicate bookings.

NumoniX — Music Learning SaaS Backend API

Backend: api.numonix.app | APK: Google Drive | GitHub: github.com/imtiaz-ahamed-hridoy/Numonix-Backend

Cross-platform music education SaaS with subscription billing and automated curriculum delivery

- **SaaS API & Recurring Billing:** Developed the production REST API (84 endpoints) and administration portal, integrating Paddle Billing v2 with Ed25519 webhook signature validation to support tiered monthly and annual subscriptions.
- **User Lifecycle & Automation:** Built the Founder Programme trial engine to manage automated 30-day trial clocks, scheduled renewal reminders, promotional upgrade offers, and automated cron subscription state updates.
- **Testing & Code Quality:** Wrote and maintained automated unit, feature, and integration test suites covering user authentication, subscription transitions, and webhook processing to ensure regression-free releases.
- **Streaming Performance & Mobile Integration:** Optimized audio curriculum streaming endpoints to sustain under 180ms p95 API response latency and 35ms database query latency. Integrated mobile checkout and subscription verification flows with the cross-platform Flutter application.

Sinozia — AI Video Character Swap Platform

Website: sinozia.com | GitHub: github.com/imtiaz-ahamed-hridoy/Sinozia

Generative AI platform transforming video characters with face swapping and cloned voiceovers

- **Automated Pipeline Orchestration:** Architected a 7-stage asynchronous queue pipeline connecting video frame extraction, prompt generation, preview rendering, Kling AI video rendering, ElevenLabs voice cloning, and final video composition into a cohesive user workflow.
- **Multi-Provider AI Abstraction:** Built a flexible vision provider layer using Strategy and Factory design patterns, allowing the system to switch between OpenAI GPT-4o, Google Gemini, and Anthropic Claude through configuration without code changes.
- **User Balance & Queue Management:** Built the credit billing system using database transactions and concurrency control to prevent balance race conditions during concurrent generations, backed by automated polling workers on Hostinger VPS.
- **API Performance & Reliability:** Optimized job status polling and asset creation endpoints to maintain under 180ms p95 response times and 35ms query latency under concurrent video processing workloads.

Lokaa — Service Marketplace Platform

Website: lokaa.uk | Backend: api.lokaa.uk | GitHub: github.com/imtiaz-ahamed-hridoy/Lokaa

Two-sided on-demand local services marketplace connecting UK service providers with consumers

- **Platform Architecture & Rapid Delivery:** Designed and launched the full two-sided marketplace from scratch in two weeks across 66 API routes (137 route definitions), covering geolocation search, provider profiles, booking requests, and email OTP verification.
- **Real-Time Messaging:** Implemented bidirectional real-time chat and push notifications between customers and service providers using Laravel Reverb WebSockets and Firebase Cloud Messaging.
- **Search & Database Tuning:** Optimized marketplace category filtering and location-based provider queries with composite indexing and Redis caching, achieving 35ms database query latency and under 180ms p95 API response times.
- **Production Deployment:** Configured production VPS infrastructure on Hostinger (CloudPanel) with Nginx, SSL certificates, Supervisor queue workers, and automated deployment scripts.

E-Holidays Villas — Holiday Villa Rental Booking Platform

Website: e-holidaysvillas.com | Backend: api.e-holidaysvillas.com | GitHub: github.com/imtiaz-ahamed-hridoy/E-Holidaysvillas

Direct-to-consumer luxury vacation rental booking platform with dynamic seasonal rate calculation

- **Booking Engine & Dynamic Rates:** Built the vacation rental booking platform with real-time property availability calendars, custom seasonal rate calculation matrices, Google Maps location search, and Stripe payment processing across 35 migrations.
- **Legacy Database Migration:** Developed a data import pipeline that cleaned, normalized, and imported 193,000+ lines of legacy VRS7 SQL databases into a modern relational schema with zero data loss.
- **Availability Search Optimization:** Tuned date-range availability and pricing queries using database indexes and Redis caching, achieving 35ms database query latency and under 180ms p95 API response latency.
- **Production Environment:** Configured and maintained the cPanel hosting environment, setting up automated database backups, transactional email deliverability, and Nginx reverse proxy rules.

EDUCATION

Bachelor of Science in Computer Science & Engineering (ongoing) — 2023 – 2027
Bangladesh University of Business & Technology (BUBT), Dhaka

Diploma in Computer Science & Technology (CGPA: 3.75 / 4.00) — 2019 – 2023
Dinajpur Institute of Science & Technology, Dinajpur, Bangladesh

Secondary School Certificate (SSC) — Science (GPA: 4.50 / 5.00) — 2018 – 2019
Lions School and College, Saidpur, Bangladesh

TRAINING & CERTIFICATIONS

ISP Setup Using MikroTik and Cisco Certified Network Associate (CCNA) — ICC Teleservices Ltd, Dhaka (2025)

Web Development Using Laravel — Career Source BD, Dinajpur, Bangladesh (2023)

LANGUAGES

Bengali: Native | **English:** Professional working proficiency
