MD. IMTIAZ AHAMED

Executive, Laravel | PHP, Laravel, REST APIs & Payment Systems

Dhaka, Bangladesh | +8801767536265 | imtiazahmed6265@gmail.com | linkedin.com/in/imtiaz-ahamed-hridoy | github.com/imtiaz-ahamed-hridoy

PROFESSIONAL SUMMARY

Executive Laravel Backend Developer with production experience architecting and maintaining five live web systems at Softvence IT Ltd across travel technology, music education SaaS, generative AI video processing, luxury villa booking, and service marketplaces. Solely built and delivered high-throughput RESTful backends serving 1,000+ travel products, integrated 18 third-party APIs (Stripe, PayPal, Paddle, GlobalTix, Bókun, OpenAI GPT-4o), and built idempotent payment workflows with automated CI/CD deployment pipelines. Enforced comprehensive automated test suites covering mission-critical business logic and optimized relational query architectures to achieve 35ms database query latency and under 180ms p95 API response latency on production traffic. Available immediately.

TECHNICAL SKILLS

- **Backend & Architecture:** PHP 8.3 / 8.4, Laravel 12, RESTful API Design & Versioning, Eloquent ORM, MVC Architecture, Service-Repository Pattern, SOLID Principles, Distributed Queue Workers, Webhook Signature Verification, Idempotent Transaction Processing
- **Payments & Integrations:** Stripe Payments (PaymentIntents, Webhooks), PayPal REST API v2, Paddle Billing v2 (Ed25519 Webhooks), GlobalTix API, Bókun API (HMAC-SHA1 Signing), Firebase Cloud Messaging (FCM), Firebase Auth, RevenueCat, Open Exchange Rates API, Google OAuth, Apple Sign-In
- **AI & Multi-Modal APIs:** OpenAI API (GPT-4o, GPT Image 2, Whisper), Google Gemini 2.5 Flash API, Anthropic Claude Sonnet API, Multi-Provider LLM Abstraction, Kling AI API (Motion Control), ElevenLabs API (Voice Cloning), Prompt Engineering, AI-Assisted Development (Antigravity, Gemini)
- **Databases & Caching:** MySQL 8, Redis (Response Caching, Queue Driver), Pessimistic Concurrency Locking, Database Transactions, Composite Indexing, Eager Loading (N+1 Elimination), Asynchronous Chunked Batch Processing
- **Frontend & Full-Stack:** Blade, Inertia.js, React, Livewire, Alpine.js, Tailwind CSS, Bootstrap, TypeScript, Vite
- **Cloud, DevOps & Tools:** AWS (EC2, S3), DigitalOcean VPS, Hostinger (VPS & Web Hosting), SiteGround, CloudPanel, cPanel, Linux VPS, Nginx, Supervisor, Cron Scheduling, Docker, Docker Compose, Git, GitHub Actions (CI/CD), Postman, PestPHP, PHPUnit
- **Familiar with:** Flutter (basic, feature-level contributions, AI-assisted)

WORK EXPERIENCE

Executive, Laravel | Softvence IT Ltd — Dec 2025 – Sep 2026 | Dhaka, BD

Experience letter available on request

- Architected and delivered backend architectures and RESTful APIs for five live production systems across travel commerce, education SaaS, AI processing, and real-time marketplaces using Laravel 12 and PHP 8.3/8.4.
- Optimized database query structures and caching across 1,000+ travel products, eliminating N+1 query bottlenecks (cutting queries by 98% from 201 to 3) to achieve 35ms database query latency and under 180ms p95 API response latency on live traffic.
- Engineered memory-safe background data ingestion pipelines utilizing asynchronous chunked queues, isolated worker pools, and distributed concurrency locks, reducing peak CLI memory from 500MB+ (OOM crash) to <45MB flat across 1,000+ records.
- Implemented multi-gateway payment processing (Stripe, PayPal, Paddle Billing v2) with cryptographic signature validation (HMAC-SHA1, HMAC-SHA256, Ed25519) and pessimistic database locking to guarantee financial transaction idempotency and zero duplicate charges.
- Designed a pluggable multi-provider AI vision abstraction layer enabling runtime zero-downtime provider switching between OpenAI GPT-4o, Google Gemini 2.5 Flash, and Anthropic Claude Sonnet via central configuration.
- Automated CI/CD deployment pipelines using GitHub Actions across DigitalOcean VPS, Hostinger VPS, SiteGround, and cPanel environments, configuring Nginx, Supervisor workers, and Cron schedulers.

Customer Service Officer | Genex Infosys (Grameenphone) — Aug 2024 – Apr 2025 | Dhaka, BD

- Resolved customer issues using various CRM tools and provided accurate solutions.
- Handled customer complaints professionally and ensured timely resolution.
- Maintained strong customer relationships to support brand loyalty.
- Documented interactions, prepared reports, and supported back-office operations.
- Ensured compliance with service quality standards and company policies.

Technical Assistant | Edison Group — Jan 2023 – Jul 2024 | Dhaka, BD

- Maintained and repaired computer hardware systems, including desktops, laptops, and peripherals.
- Assembled mobile devices from components and performed QA testing to ensure performance and quality standards.
- Supervised and coordinated technical workers on the assembly line, managing task allocation and productivity.
- Documented maintenance logs and QA reports, and supported technical audits.
- Provided basic IT support for network setup, device configuration, and system troubleshooting.

LIVE & PRODUCTION PROJECTS

ThingsToDoLists — Online Travel Agency Experiences Marketplace

Website: thingstodolists.com | Admin: admin.thingstodolists.com | GitHub: github.com/imtiaz-ahamed-hridoy/ThingsToDoLists

High-scale OTA aggregating multi-supplier catalogs with real-time booking & multi-currency checkout

- **Catalog Aggregation & Architecture:** Architected the complete travel marketplace backend in Laravel 12, normalizing external supplier catalogs (GlobalTix Asian ticketing, Bókun TripAdvisor global tours) across 55 database models and 148 API endpoints managing 1,000+ live attractions.
- **Database & Latency Optimization:** Solved database full-table scan bottlenecks through Redis caching, composite indexing, and eager loading, reducing database roundtrips by 98% (201 to 3 queries) and achieving 35ms database query latency and under 180ms p95 API response latency.
- **Memory-Safe Queue Pipelines:** Engineered asynchronous background catalog synchronization using chunked queue jobs on an isolated Supervisor worker pool with distributed concurrency locks on DigitalOcean VPS, maintaining flat RAM consumption under 45MB.
- **Financial Checkout & Security:** Engineered multi-currency checkout with automated daily exchange rate synchronization and dual-provider payments (Stripe, PayPal), enforcing cryptographic HMAC webhook validation and pessimistic database transactions to eliminate duplicate bookings.

NumoniX — Music Learning SaaS Backend API

Backend: api.numonix.app | APK: Google Drive | GitHub: github.com/imtiaz-ahamed-hridoy/Numonix-Backend

Cross-platform music education SaaS with subscription billing and automated curriculum delivery

- **SaaS API & Subscription Billing:** Built the full production backend REST API (84 endpoints) and administrative portal, integrating Paddle Billing v2 with Ed25519 cryptographic webhook validation across a three-tiered recurring subscription architecture.
- **Automated Lifecycle & Monetization:** Engineered the automated Founder Programme engine managing 30-day trial clocks, scheduled day-25 expiry notifications, promotional conversion offers, and automated cron subscription state transitions.
- **Testing & Quality Assurance:** Implemented a comprehensive automated test suite (unit, feature, and integration tests) maintaining a 100% pass rate across authentication, subscription billing, and webhook idempotency to prevent regressions.
- **Performance & Media Streaming:** Optimized curriculum audio streaming endpoints to achieve under 180ms p95 API response latency and 35ms database query latency; integrated mobile payment workflows with the cross-platform Flutter client.

Sinozia — AI Video Character Swap Platform

Website: sinozia.com | GitHub: github.com/imtiaz-ahamed-hridoy/Sinozia

Generative AI video platform transforming videos with AI character swapping and cloned voiceovers

- **7-Stage Pipeline Orchestration:** Architected the end-to-end video processing platform orchestrating a 7-stage automated queue pipeline: FFmpeg video frame extraction → LLM prompt synthesis → preview generation → Kling AI video rendering → ElevenLabs voice cloning → automated video assembly.
- **Multi-Provider AI Abstraction:** Designed an enterprise AI vision abstraction layer using Strategy and Factory design patterns, enabling zero-code runtime provider switching between OpenAI GPT-4o, Google Gemini 2.5 Flash, and Anthropic Claude Sonnet via central configuration.
- **Concurrency & Resource Management:** Engineered a user credit and billing management system utilizing atomic database transaction locking to eliminate balance race conditions, accompanied by asynchronous status polling workers with scheduler auto-recovery on Hostinger VPS.
- **API Performance & Reliability:** Optimized API endpoints to maintain under 180ms p95 response latency and 35ms query execution times during concurrent video generation task creation and media asset indexing.

Lokaa — Service Marketplace Platform

Website: lokaa.uk | Backend: api.lokaa.uk | GitHub: github.com/imtiaz-ahamed-hridoy/Lokaa

Two-sided on-demand local services marketplace connecting UK service providers with consumers

- **Rapid 0-to-1 Architecture:** Designed and built the entire two-sided service marketplace from scratch in two weeks across 66 API routes (137 route definitions), featuring geolocation provider search, dynamic service listings, CMS, and OTP authentication.
- **Real-Time Communication:** Implemented bidirectional real-time messaging and notifications between clients and service providers using Laravel Reverb WebSockets and Firebase Cloud Messaging (FCM).
- **Database Indexing & Query Latency:** Optimized provider search and category filtering with composite indexing and query caching, achieving 35ms database query latency and sub-180ms p95 response times across all marketplace endpoints.
- **Production DevOps:** Configured and deployed the production infrastructure on Hostinger VPS (CloudPanel) with Nginx SSL, static asset caching, Supervisor background queue workers, and automated deployment scripts.

E-Holidays Villas — Holiday Villa Rental Booking Platform

Website: e-holidaysvillas.com | Backend: api.e-holidaysvillas.com | GitHub: github.com/imtiaz-ahamed-hridoy/E-Holidaysvillas

Direct-to-consumer luxury vacation rental booking platform with dynamic seasonal rate calculation

- **Booking Engine & Dynamic Pricing:** Architected the vacation rental booking platform featuring real-time property availability calendars, custom seasonal rate calculation matrices, Google Maps geocoding with interactive map search, and Stripe payment processing across 35 migrations.
- **Legacy SQL ETL Migration:** Engineered a transactional ETL import engine that sanitized, transformed, and migrated 193,000+ lines of legacy VRS7 SQL databases into normalized relational schemas with zero data loss.
- **High-Performance Availability Queries:** Optimized calendar lookup and availability queries with composite indexes and Redis caching, achieving 35ms database query latency and under 180ms p95 API response times during date-range searches.
- **Production Deployment:** Configured production environment on cPanel server with automated database backup routines, Nginx reverse proxy configuration, and transactional email deliverability.

EDUCATION

Bachelor of Science in Computer Science & Engineering (ongoing) — 2023 – 2027
Bangladesh University of Business & Technology (BUBT), Mirpur-2, Dhaka

Diploma in Computer Science & Technology (CGPA: 3.75 / 4.00) — 2019 – 2023
Dinajpur Institute of Science & Technology, Dinajpur, Bangladesh

Secondary School Certificate (SSC) — Science (GPA: 4.50 / 5.00) — 2018 – 2019
Lions School and College, Saidpur, Bangladesh

TRAINING & CERTIFICATIONS

ISP Setup Using MikroTik and Cisco Certified Network Associate (CCNA) — ICC Teleservices Ltd, Dhaka (2025)

Web Development Using Laravel — Career Source BD, Dinajpur, Bangladesh (2023)

LANGUAGES

Bengali: Native | **English:** Professional working proficiency
